Water and Sewage Works Volume 6

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 146 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1894 edition. Excerpt: . . . pounds for a sectional area of one square inch is ascertained. Any other degree of strength could be used for this purpose, but preference is given to the one named on account of convenience in testing, ascertained by experience. The writer has invented and uses an instrument called a tractor, with which test pieces of asphaltic cement, etc. , are with the utmost facility prepared so as to have uniform density and dimension; and the tests of strength are made with a specially devised apparatus which registers in each case the breaking strain of the sample. The results secured harmonize well and give satisfactory evidence of the sufficient accuracy of the results obtained. The following data are transcribed from the writers laboratory records to illustrate the results secured in tests of this character: A strength of one hundred pounds per square inch of area...
