By University Of Delaware Station

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1896 Excerpt: .An examination of the figures relating to yield shows us that the crop in 1898 was about one-fourth larger than that in 1897. Comparing our weather records for the growing months of those years we have the following data: Temperatu-e. Rainfall in inches. 1897. 1898. 1897. 1898. June, 67.3 70 1.02 3.08 July, 74.2 76.5 8.70 4.44 August 71.3 74.4 2.95 7.02 September, 64.3 67.1.99 2.57 October, 54.6 55.4 2.93 4.83 Average, 66.3 68.7 Total 16.59 21.94 It will readily be seen that the increased crop of 1898 may be accounted for by differences in amount and distribution of heat and rainfall. In June, 1898, the rainfall was such that the seed germinated quickly and had ideal conditions for rapid growth during its early days, while in June, 1897, the smaller precipitation and lower temperature were less favorable to growth. In July and August the chief...
