RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 122 pages. Original publisher: Cincinnati, Ohio: U. S. Environmental Protection AgencyUniversity of Cincinnati, 1998- OCLC Number: (OCoLC)53158508 Subject: Environmental quality -- Technological innovations -- Europe -- Periodicals. Excerpt: . . . Illustration of the Path Diagram. i Yl v Y2 Y6 Ys Y4 Y3 Yl Composition Figure 4. Path diagram. energy induced separation network not only incorporates these heat-transfer type unit operations, but also involves the use of pressurization and depressurization techniques to enhance the thermodynamics of the separation. The final technique discussed by Dr. Dunn was the waste interception and allocation network which is based on the concept that it is cheaper to perform separations in the heart of a process. When pollutants are formed early it is more prudent to perform a separation within the heart of the plant, so by the time the streams reach the end of the pipe they are already environmentally acceptable. Along the same lines, using energy separators and or pressurization techniques within the heart of the plant can also yield the same kind of effects and there are numerous case studies to illustrate the cost-effectiveness of these technologies. In conclusion, there are a series of existing process integration tools that are effective, even though it may take some time to learn how to use them correctly. Using these analyses techniques at the Solutia Pensacola site resulted in a reduction of 650 gallons min of wastewater which was approximately 3 5 of the entire wastewater flow. Dr. Dunn outlined similar success stories at other sites. Ultimately, these tools allow engineers to address problems at large sites in a very short period of time. 8 This item ships from La Vergne, TN. Paperback.
